Experience

Amdocs / Java Developer

JUN 2021 - PRESENT, PUNE

Currently, working on an Environment monitoring tool which helps the testing team to identify the services and business flows status on different environments. This tool also helps to identify the interfacing application connectivity. I single handedly lead the effort to build this portal using spring-boot and angular. My responsibilities include initial research, planning, designing and execution.

I worked developing Orbit Tools portal which allows users to find relevant information for business orders. I led the efforts to build REST apis using spring-boot framework, handle exceptions and include logging. My responsibilities include initial research, planning, designing and execution.

I also worked in a team which was responsible for developing SOE application which is a Service Ordering Application built using Struts2 framework. My role was to build a feature that allows users to place a specific type of order (toll free order) with necessary order details. My responsibilities include initial research, planning, designing the feature, execution on a spec and testing.

Projects

Online Doctor Appointment System

Design and developed a full stack application that allows users to search doctors by location and category and book a free slot for future visit. Doctors can also give online prescriptions, view past records and future appointments. This project was built on MVC architecture which uses Java Servlets, JSP, MySQL and HTML/CSS.

Education

Nirma University / B-TECH

JUL 2017 - MAY 2021, AHMEDABAD   GPA : 8.1

Shiv Jyoti Convent School / HSC

JUL 2015 - MAY 2017, KOTA   Percentage : 87.80%

Awards

🏆 Rookie Rockstar - Shoot for the Stars Award   *Amdocs-2022*
